Hello world!

▶ **Theorem 1.** *This is a great result. It has an equation:*

$$\sum_{k=1}^{\infty} \frac{1}{k^2} = \frac{\pi^2}{6} \tag{1}$$

The equation number is (1).

**Proof sketch.** This is the proof sketch of Theorem 1. ◀

## 1 Section without Theorems

Since this section does not have any appendix content, it will not appear in the appendix. [1]

## 2 Section with Some Appendix Content

▶ **Example 2.1.** *Examples are numbered within a section.*

Not much in the main text.

## 3 Section with Theorems (long)

▶ **Theorem 2.** *Another great result.*

**Proof sketch.** Proof sketch of Theorem 2. ◀

▶ **Theorem 3.** *Another great result, without any proof sketch.*

▶ **Theorem 4.** *A regular theorem, not repeated.*

**Proof.** This regular theorem is naturally followed with an inline proof. ◀

▶ **Theorem 5.** *A repeated theorem, but with two proofs, one in Appendix and one in main text.*

**Proof.** Main text proof of Theorem 5. ◀

## 4 Last *Section*

▶ **Theorem 6** (with note)**.** *Another theorem.*

▶ **Theorem 7.** *Last theorem, not repeated.*

**Proof.** Proof, inlined. ◀
