SyncTeX support

Author

With the `synctex` option, appendix material and repeated theorems are re-read from the source files, so that SyncTeX points to the right lines. The check script queries SyncTeX for the position of the marked words on the appendix pages.

1 Repeated Theorems

Theorem 1 (Named)**.** *This is the statement of the named theorem, marked quokka. It has an equation:*

$$\sum_{k=1}^{\infty} \frac{1}{k^2} = \frac{\pi^2}{6} \tag{1}$$

Lemma 2 (Wrapped)**.** *This lemma is wrapped in a user environment, marked numbat.*

Theorem 3. *Centered statement, marked dingo.*

Theorem 4. *Single-line statement, marked kookaburra.*

Text after the end, marked platypus.

2 Material Sent to the Appendix

Some main text.

Two cases found in real documents. First, an appendix block that consists of a heading only: the paragraph that follows it comes from another block, and must be treated as following a heading (no indentation, no page break) just as when appendix material is copied.

Second, an alignment ended in the block: the `\end` of an environment must remain expandable when TEX scans the start of an alignment row, or an empty row is added.

Third, a repeated theorem stated inside an appendix block, which is then just a theorem of the appendix.

3 Included File

Lemma 5. *Statement in the included file, marked emu.*

A Proofs for Section 1 (Repeated Theorems)

Theorem 1 (Named)**.** *This is the statement of the named theorem, marked quokka. It has an equation:*

$$\sum_{k=1}^{\infty} \frac{1}{k^2} = \frac{\pi^2}{6} \tag{1}$$

Proof. This is the proof of the named theorem, marked wombat, and it refers to (1). □

Lemma 2 (Wrapped)**.** *This lemma is wrapped in a user environment, marked numbat.*

Proof of the wrapped lemma. [This proof starts with a bracket and is marked bilby.] □

Theorem 3. *Centered statement, marked dingo.*

Proof. Proof of the centered statement, marked echidna. □

Theorem 4. *Single-line statement, marked kookaburra.*

Proof. Single-line proof, marked cassowary. □

B Proofs for Section 2 (Material Sent to the Appendix)

Appendix material, marked wallaby, with a proof:

Nested. Nested proof, marked koala. □

C Own section, marked galah

This appendix section replaces the automatic heading.

C.1 Heading alone in its block

Paragraph after the heading, marked kiwi.

Marked	tenrec
Second	row

Before the nested theorem, marked lorikeet, on the same line.

Lemma 6. *Nested lemma, marked pademelon.*

Proof. Its proof, marked possum. □

After the nested theorem, marked tuatara.

D Proofs for Section 3 (Included File)

Lemma 5. *Statement in the included file, marked emu.*

Proof. Proof in the included file, marked cockatoo. □
